Group of companies PSS is a registered Ukrainian company which operates in the market of professional diving services since 1993. It specializes in conducting various underwater and technical works at oil extracting platforms, pipeline transport, in energy and heavy industry. Using equipment and outfits by leading world manufacturers the company observes all labor protection norms while doing underwater works. It follows the idea of keeping international standards of safety and protection of the environment everywhere it operates.

Such factors as supporting of long-term relations with our customers and stably growing volumes of works allow to take group of companies PSS, for a leader of Ukrainian market of diving services. During the years we also performed diving works both in CIS countries (Russia, Turkmenistan) and foreign countries (Vietnam, Yemen, Iraq).

For 23 years of activity we proved to be a reliable partner who gives professional solution for our customer. Such international documents as Lloyd's Register Recognition, American Bureau of Shipping Approval, Bureau Veritas welding certificates, Quality management system Certificate in compliance with ISO 9001-2015 standards and a diversity of national confirmative and permissive documents indicate a high professional level of our services.

Our prequalifications:

License №2064 License №387737-K

License №IR201801029

License №309139

Company Lines of Activity

- Complex underwater inspection on depths up to 60 meters. Instrumental evaluation of electrochemical protection potential on protectors and other elements. Ultrasonic analysis of welds and metal constructions, measuring of thickness, insulating covering diagnosis. Video and photo documenting.

- Underwater welding and cutting by using both manual and automanual mechanized welding equipment. Installation of protectors, metal patches, cutting and removal of damaged pipeline sections.

- Laying and repair of pipelines and communication cables.

- Underwater jetting.

- Diagnosis of insulation and its renovation by using non-destructive inspection technique.

- Underwater concreting with ultrasonic diagnosis. Determining concrete construction integrity and interstices. Renewal of concrete constructions by using plugging and fastening solution.

- Installation of constructions of any complexity by using clamps and underwater welding.

Equipment

We have all IMCA certified equipment required for diving works

Diving equipment

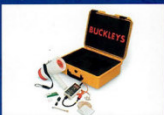

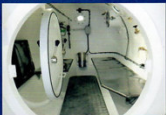

- Decompression chambers DRAEGER
- High pressure compressors BAUER, COLTRI-SUB
- Diving equipment KIRBY MORGAN
- Underwater welding equipment BROCO
- High pressure cleaning equipment OERTZEN
- LARS (Launch and Recovery System)
- Machinery Control ISO container
- IMCA Standart LF/DNV Certified Machinery Container
- Diesel HPU DP56 MK3
- Umbilicals and hoses
- Stanley Impact Wrench IW24
- Stanley Grinder 9" UW GR29
- Stanley Drill PG1/2" DL07 UW
- Hyd Peanut Grinder UW PG03
- Hyd Twin Brush Hull Cleaning Machine

Diagnostic equipment

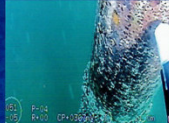

- Ultrasonic thickness measurer CYGNUS-1
- Cygnus DIVE Mk2 Underwater Thickness Gauge
- Buckleys BathyCorrometer

Underwater video and photo equipment

- Underwater videosystems SONY
- Underwater digital photo equipment OLYMPUS
- ROV equipment SAAB, INDEL PARTNER

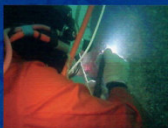

Projects

Installation of new braces at offshore platform LAM-22	Turkmenistan, Caspian Sea	2000	Dragon Oil
			
Pipeline laying-out at Feodosiyskiy oil terminal	Ukraine	2000	CNGS
			
Dismantling of underwater parts of offshore platform TP-1 at Vostochno-Kazantipskoye gas-condensate field (underwater cutting works)	Ukraine, Sea of Azov	2002	Chernomor- neftegaz
			
Visual and instrumental inspection of offshore platform MSP-4 at Galitsinskoye gas-condensate field	Ukraine, Black Sea	2004	Chernomor- neftegaz
			

Projects

Reconstruction of underwater part of existing platform LAM-10 by installation of new braces	Turkmenistan, Caspian Sea	2005	CCC
Installation of electrochemical protection system (anodes and protectors by underwater welding) at offshore platform LAM-21	Turkmenistan, Caspian Sea	2005	Dragon Oil

Inspection of LAM-10. Visual inspection, measuring of thickness, inspection of all welds	Turkmenistan, Caspian Sea	2005	Dragon Oil
--	---------------------------	------	------------

Construction of Dnipro river bridge, underwater installation of clamped units, underwater welding	Ukraine, Kiev	2008	Ukraudodor
---	---------------	------	------------

Survey & Inspection of Seabed, Pipelines, Risers and Platforms at Oilfield at Caspian Sea	Turkmenistan Caspian Sea	2011-2013	Dragon Oil
---	--------------------------	-----------	------------

Certificates:

The company "PSS" has all necessary licenses and certificates to perform underwater-technical works all over the world in particular:

1. Lloyd's Register Certificate
2. Det Norske Veritas 6G subsea welding Certificate
3. Bureau Veritas Certificate ISO 9001:2015
4. ABS Certificate of Recognition
5. Bureau Veritas Certificate ISO 14001:2015
6. Bureau Veritas Welding Certificates
7. The national license for diving works
8. Bureau Veritas Certificate OHSAS 18001:2017
9. American Welding Society Supporting Company Member

Russia, Moscow
Reconstruction of gas
pipeline

Ukraine, Black sea
gas pipeline Shormovoe-
Archangelskoe

Ukraine, Feodosia
Construction of
petroleum terminal

Iraq, Arabian Gulf
Inspection of the sunk ships

Ukraine, Crimea
